Corporate tax

Guiding you through the complex web of VAT.

For anyone who owns their own business or deals with accounting and invoicing matters on a daily basis, you will know that VAT is notoriously complicated and time consuming.

As a self-assessed tax, you will also know that it is your responsibility to get it right first time. And it is an essential part of running your business, whether it is located in the UK, elsewhere in the European Union or even if you are based outside of the EU but want to trade within its borders.

This is where we can help. At UHY Hacker Young, our VAT specialists have a long standing reputation in dealing with a wide range of VAT issues. It is our job to keep you fully informed of changes in legislation as well as helping you navigate through the complex web of rules and regulations.

We will also make sure you have the correct compliance procedures in place to ensure you are maximising your cash flow and are not exposed to errors and unnecessary penalties.

WHEN TO ENLIST OUR HELP

There are some aspects to VAT accounting that do not require the involvement of specialists. Equally, there are many situations that do. The following is a list of VAT situations where experience tells that things can easily go wrong and we recommend our assistance should be enlisted:

- Completion of your VAT returns for you, when we can monitor long and short-term trends to make any proper disclosures to HMRC to minimise the risk of penalties and identify and pre-empt situations that may cause HMRC to raise an enquiry into your VAT affairs.
- Reviewing assessments and surcharges issued by HMRC against you to identify where the assessment/ surcharge can be challenged.
