

Accountancy services for pharmacists

Adding genuine value through our knowledge of the retail pharmacy sector, together with an understanding of the business environment in which you operate

Helping you prosper

Management accounts

Our management accounts service can be tailored to include bookkeeping using the latest cloud accounting software. You will have all your business data and KPI reports available to you via any internet enabled device.

We can also submit your tax returns and provide budget and cashflow calculations.

Payroll service

We offer a full payroll service, providing weekly or monthly cloud-based payslips to all your employees, so they can access their documents anytime.

We can make your wages payments on your behalf using our accredited BACS service. All your auto-enrolment responsibilities are covered too.

Tax planning

Our tax planning service covers corporate planning for company tax, remuneration planning for directors and other management and personal tax planning including Capital Gains Tax issues.

Our certified tax planners can discuss your requirements and formulate a plan that will optimise your tax liabilities.

Experienced with pharmacy M&A

We are well placed to offer advice on acquiring a new pharmacy. We can assist in arranging finance for an acquisition and we can advise on the structure of transactions.

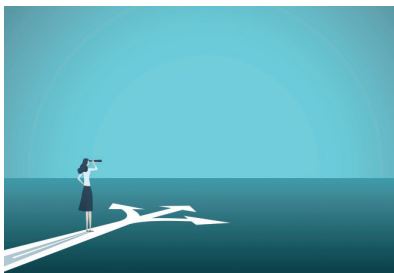

We offer tax planning in advance of the sale of your own pharmacy and can provide due diligence reports for both buyers and lenders and we work with your lawyers to achieve the best outcome.

Benchmarking service

We have a substantial number of pharmacy clients. Combined with nationally available data, we are able to undertake a benchmarking project to compare your pharmacy business with businesses of similar sizes and in similar locations.

We can provide you with a detailed report on how you are doing and identify areas for change.

Cloud solutions

If you are still using long-winded bookkeeping methods, talk to us about transferring to Cloud-based software.

We can help you choose the right software for your business and pick the right add-ons to save you time and reduce entry errors.
