

Our services

Cloud accounting

Cloud accounting is rapidly becoming the must have accounting service for SMEs.

Online access to bookkeeping and accounting is rapidly becoming the must have accounting service model for small and medium sized businesses.

Suited to businesses in virtually any sector, cloud accounting software gives you instant access to all of your key financial information, wherever you are in the world and on any device you choose. However, careful planning and consideration of the different options available is important to make sure you get the most out of the cloud.

MAKING YOUR LIFE EASIER

We will work with you to remove the hassle of your finances. By combining real time cloud technology with our expertise, we offer a range of online business support services via the internet, including accounts preparation, bookkeeping, payroll, VAT and corporate tax returns.

In providing support with the full range of routine accounting and tax functions, from dealing with your receipts and invoices to making sure your tax returns are filed on time, you will be free to concentrate on growing your business.

And because your UHY adviser will see the same information that you see, we can work more closely with you to give you the type of advice that will help you to make more informed business decisions.

We can also guide you through the process of choosing and installing the best online software for your business. Our clients come in all shapes and sizes and we know that what is right for one client may not be right for the next.

YOUR FINANCES AT YOUR FINGERTIPS

Cloud accounting has many advantages, such as:

- Giving you instant access to real time information regarding your accounts which can be accessed and worked on from any location in the world with an internet connection, via any device, be it PC, Mac or mobile.
- Access through iPads, iPhones, Android tablets and other mobile devices, enabled through apps.
- The option to tailor the software to meet your specific needs, through various powerful add-on features.
- Enabling your UHY adviser to see real-time information about your business to help you better plan for the future.
- The main cloud accounting packages have matured to the point that they are secure, viable, and highly effective.

We take the time to get to know you to ensure we recommend the package best suited to your business needs.

WHICH CLOUD SYSTEM IS RIGHT FOR YOU?

There are dozens of cloud based accounting products available and it is a buyer's market as far as we are concerned. We have experience working with a range of the different cloud providers, including Xero, Sage One, Twinfield, QuickBooks, KashFlow and FreeAgent.

Each product has particular strengths and benefits and some are more suited to one sector over another. The choice of software should come down to the specific needs of your business, the accounting experience of the users, and your personal preference regarding the user interface.

This is why we are not tied to one provider like some of our competitors, but instead we take the time to get to know you to ensure we are able to recommend the package best suited to your business needs, freeing you to concentrate on what you do best.

THE NEXT STEP

If you would like more advice about our cloud accounting support services, or if you need advice on the best cloud product for your needs, please contact your usual UHY adviser.
